367/B, Sisislasathanna,

Weniyarawela, Baddegama.

TECHNICAL SKILLS

- **Programming:** Java, Python, C#, JavaScript , React, Node.js
- **Web Development:** HTML, CSS, JS
- **Databases:** MySQL, SQL, MongoDB
- **Networking:** IP Subnetting, IP Addressing, Routing, Switching, CCNA basics
- **Design Tools:** Blender, Adobe Illustrator, Photoshop, Premiere Pro, Figma
- **Data & AI:** Excel Analysis, ML Basics, Data Processing

SOFT SKILLS

- Teamwork & Leadership
- Communication
- Problem Solving
- Time Management
- Creativity

LANGUAGES

- English
- Sinhala

EDUCATION

- **BSc (Hons) Information Technology**
  General Sir John Kotelawela Defense University — Jan 2024-Present

- **Diploma in Information Technology**
  Esoft Metro Campus, Galle — Jul 2023-Aug 2024

- **Advanced Certificate Course in English**
  NIBM, Galle — Feb 2023 - Aug 2023

- **Advanced Level**
  Christ Church Girls' College, Baddegama — 2022
  Physical Science Stream

Combined Maths	C
Physics	S
Chemistry	C

- **Ordinary Level**
  Christ Church Girls' College, Baddegama — 2019

Sinhala	A
Buddhism	A
Science	B
English	A
Mathematics	A
History	B
ICT	A
Tamil	A
Sinhala Literature	A

COURSES & CERTIFICATIONS

- **AI/ML Engineer - Stage 3** – SLIIT (Sep 2026)
- **AI/ML Engineer - Stage 2** – SLIIT (Jul 2026)
- **AI/ML Engineer - Stage 1** – SLIIT (Mar 2026)
- **Full-Stack Web Development (MERN)** – Skyrek (Jun 2026)
- **Innovation Driven Hardware & Software Exhibition and Competition 2026** – KDU
- **AI for Business Professionals** – HP LIFE (Mar 2026)
- **Foundations of Project Management** – University of Moratuwa (Oct 2023)
- **Sever Side Web Programming** – University of Moratuwa (Jan 2026)
- **Certificate for Best Performance** – CCGC (Jan 2025)
- **Front-End Web Development** — University of Moratuwa (Dec 2025)
- **CCNA: Introduction to Networks** — Cisco Networking Academy (Nov 2025)

- **Introduction to Modern AI** — Cisco Networking Academy (Nov 2025)
- **Java** (131-hour course) — Udemy (Apr 2025)
- **Basics of Data Science** — UniAthena (Feb 2025)
- **Introduction to Data Analysis using Excel** — Coursera (Feb 2025)
- **Level 3 Diploma in Information Technology** — SEG Awards (Aug 2024)
- **Advanced Certificate Course in English** – NIBM (Oct 2023)
- **Web Design for Beginners** — University of Moratuwa (Oct 2023)
- **Python for Beginners** — University of Moratuwa (Sep 2023)
- **Basics in Machine Learning** — UniAthena (Feb 2023)
- **Diploma in Human Resources (HR)** - Alison

EXTRACURRICULAR ACTIVITIES

- **Organizing Committee Member of CSSL GenZ Chapter KDU** 2026/2027
  General Sir John Kotelawela Defense University
- **Member of CSSL GenZ Chapter** 2025/2026
  General Sir John Kotelawela Defense University
- **Director of Environment** 2021/2022
  LEO Club of Christ Church Girls' College
- **Vice President** 2022
  Science Society of CCGC
- **School Prefect (Christ Church Girls' College)**
  Super Senior Prefect 2019, 2020, 2021, 2022
  Senior Prefect 2018
  Junior Prefect 2014, 2016, 2017
  Primary Prefect 2012, 2013

PROJECTS

- **AI Loan Approval Predictor** Jul 2026 – Jul 2026
  Developed a Machine Learning application that predicts whether a loan application will be approved or rejected based on applicant information such as age, income, credit score, loan amount, and employment history. The project includes realistic dataset generation, data analysis, model training, evaluation, and prediction using a Decision Tree Classifier.
  Key features: Loan applicant data collection, Dataset analysis using Pandas, Realistic dataset generation, Decision Tree Classifier, Loan approval prediction, Model evaluation with Accuracy Score, Confusion Matrix, Feature Importance visualization, Decision Tree visualization
  Technologies: Python , Pandas , Scikit-learn , Matplotlib , CSV

- **AI Student Performance Analyzer** Jun 2026 – Jul 2026

  Developed a Machine Learning application using Python to analyze student performance and predict Pass/Fail status using a Decision Tree Classifier.

  Key Features: Student data collection and CSV storage, Data analysis using Pandas, Machine Learning model training with Scikit-learn, Decision Tree visualization, Prediction confidence, Feature importance analysis, Confusion Matrix for model evaluation

  Technologies: Python, Pandas, Scikit-learn, Matplotlib

- **SKYREK – Computer Store E-Commerce Website** Dec 2025 – May 2026

  Developed a full-stack e-commerce web application as a practical project during the Full-Stack Web Development (MERN) course at SKYREK (PVT) LTD.

  The project is a computer store platform where users can browse products such as laptops, monitors, keyboards, mice, graphics cards, RAM, and storage devices. It includes user authentication, product browsing, category-based filtering, and a responsive user interface. Through this project, I gained practical experience in developing and integrating both frontend and backend components using the MERN stack.

  Technologies: React.js, Node.js, Express.js, MongoDB, JavaScript, HTML, CSS, Git & GitHub.

- **Quiz Hub - Online Quiz Management System** Mar 2026 – 2026 Apr

  QuizHub is a full-stack web-based Online Quiz Management System developed as a group project for the Programming Frameworks module. The system allows lecturers to create and manage quizzes, automatically evaluate answers, generate reports, and monitor student performance, while students can attempt quizzes and receive instant results.

  The system was developed using a 3-tier architecture to ensure scalability, maintainability, and separation of concerns. It also includes advanced features such as PDF-based quiz generation, automated marking, performance analytics, and secure authentication.

  Technologies: React, Node.js, Express.js, MongoDB, REST API, JavaScript, HTML, CSS, MERN Stack

  Key Features: User authentication and role management, Quiz creation and management, Automatic quiz evaluation, PDF-based quiz generation, Performance tracking and analytics, Report generation, Responsive UI design, Secure database integration

- **Driving School Management System (DSMS) – Group Project** Jun 2025 – Nov 2025

  Second-Year Industry-Based Software Engineering Project

  Developed a full-stack web-based Driving School Management System to digitize and automate manual processes with a centralized platform.

  Role: Software Engineer

  Technologies**:** JavaScript, Node.js, React, MongoDB, Figma, NodeMailer, GitHub

  Key Functionalities: The system supports student account management with registration, profile handling, and progress tracking, instructor account management including availability, lesson scheduling, and progress monitoring, online reservations and timetable scheduling, a secure payment module for invoicing and payment tracking, digital exam management with result recording, analytics and reporting for management decision-making, and an assistance and help feature with an integrated chatbot for guidance and notifications.

- **Aurora Cinema – Modern Movie Ticket Booking Website** Jul 2025 – 2025 Oct

  Group Project | Web Technologies

  Aurora Cinema is a web-based movie ticket booking platform developed as a group project for the Web Technology module. The main objective of this project was to simulate a real-world cinema ticket reservation system while applying fundamental frontend development concepts and responsive web design techniques.

  The system provides a modern and user-friendly interface with interactive components such as movie browsing, seat selection, and booking management. The project mainly focused on creating a responsive and visually appealing UI while improving practical knowledge of frontend technologies.

  Key Features: User authentication system (Login, Signup, Forgot Password), Interactive seat selection interface, Movie browsing with detailed UI, Booking history management, Fully responsive design for mobile and desktop

  Technologies: HTML5, CSS3, JavaScript, Bootstrap, Font Awesome, GitHub, VS Code

- **Advertisement for a New Car Model – Visual Computing Group Project** Aug 2024 - Nov 2024

  Tools: Blender, Adobe Illustrator, Adobe Premiere Pro

  Created a promotional video for a fictional car brand showcasing performance, design, and brand identity. I gained experience in 3D visualization and graphic design and enhanced teamwork and creative storytelling skills.

- **Skills International Application** Jun 2024 - Jul 2024

  Designed and developed a student and lecturer management system for Skills International School using C# and MySQL in Visual Studio. The system enables students to log in for exams and allows lecturers to view student results securely. Implemented user authentication, registration, database integration, and UI design for an intuitive experience.

- **JavaScript 2D Game** Jan 2023 - Mar 2023

  Building a 2D sprites animation game using pure HTML, CSS, and JavaScript. About Game
